Trello Board

Day 6 (9/5/22)

Trello Board: MSP Sprint 2

Product Backlog

- F1 - Add a new member
- F2 - Deactivate member
- F3 - Search for member
- F4 - Edit existing member
- F5 - Add a sales record
- F6 - Record in the spreadsheet of purchase logs and product levels. Downloadable in CSV format
- F7 - Search for sales record
- F8 - Update sales record
- F9 - Remove Sales record from view
- F10 - Produce a daily sales report on popular items (what was sold the most). Downloadable in CSV format
- F11 - Produce a weekly sales report on popular items (what was sold the most). Downloadable in CSV format
- F12 - Produce a monthly sales report on popular items (what was sold the most). Downloadable in CSV format

Sprint 2 Backlog

- 5.0 Implement CSS

S2 - To Do

- 3.3.1 Create HTML form for updating sales records
- 3.3.2 Come up with SQL queries for updating sales records
- 3.3.3 Develop PHP page(s) for updating sales records
- 3.4 F9 Remove Sales record from view
- 3.4.1 Create HTML form for removing sales records from view
- 3.4.2 Come up with SQL queries for removing sales records from view
- 3.4.3 Develop PHP page(s) for removing sales records from view
- 5.1 Develop CSS file
- 5.2 Include CSS file in header.php

S2 - Doing

- 2.0 Member management functions
- 3.0 Sales record management functions

S2 - Testing

- + Add a card

S2 - To be confirmed

- 2.1 F1 Add a new member (remake in PHP)
- 3.1 F3 Add a sales record
- 4.1 F6 Record in the spreadsheet of purchase logs and product levels. Downloadable in CSV format
- 4.2 F10 Produce a daily sales report on popular items (what was sold the most) Downloadable in CSV format
- 4.3 F11 Produce a weekly sales report on popular items (what was sold the most) Downloadable in CSV format
- 4.4 F12 Produce a monthly sales report on popular items (what was sold the most) Downloadable in CSV format

S2 - Done

- 4.2.2 Come up with SQL queries for retrieving sales records
- 4.2.3 Develop PHP page(s) for generating daily sales reports
- 4.3.1 Create HTML form for generating weekly sales reports
- 4.3.2 Come up with SQL queries for retrieving sales records
- 4.3.3 Develop PHP page(s) for generating weekly sales reports
- 4.4.1 Create HTML form for generating monthly sales reports
- 4.4.2 Come up with SQL queries for retrieving sales records
- 4.4.3 Develop PHP page(s) for generating monthly sales reports
- 4.0 Report generation

Day 7 (10/5/22)

Trello Board: MSP Sprint 2

Product Backlog

- F1 - Add a new member
- F2 - Deactivate member
- F3 - Search for member
- F4 - Edit existing member
- F5 - Add a sales record
- F6 - Record in the spreadsheet of purchase logs and product levels. Downloadable in CSV format
- F7 - Search for sales record
- F8 - Update sales record
- F9 - Remove Sales record from view
- F10 - Produce a daily sales report on popular items (what was sold the most). Downloadable in CSV format
- F11 - Produce a weekly sales report on popular items (what was sold the most). Downloadable in CSV format
- F12 - Produce a monthly sales report on popular items (what was sold the most). Downloadable in CSV format

Sprint 2 Backlog

- 5.0 Implement CSS

S2 - To Do

- 3.2 F7 Search for sales record
- 3.2.1 Create HTML form for searching sales records
- 3.2.2 Come up with SQL queries for searching sales records
- 3.2.3 Develop PHP page(s) for searching sales records
- 3.3 F8 Update sales record
- 3.3.1 Create HTML form for updating sales records
- 3.3.2 Come up with SQL queries for updating sales records
- 3.3.3 Develop PHP page(s) for updating sales records
- 3.4 F9 Remove Sales record from view

S2 - Doing

- 3.0 Sales record management functions

S2 - Testing

- + Add a card

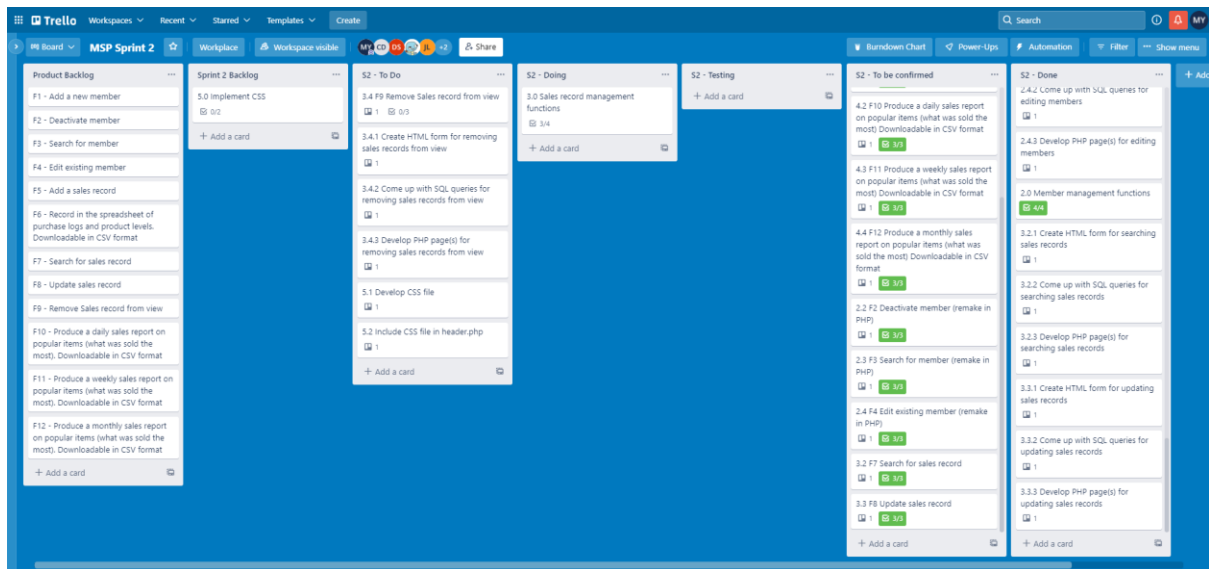

S2 - To be confirmed

- 4.1 F6 Record in the spreadsheet of purchase logs and product levels. Downloadable in CSV format
- 4.2 F10 Produce a daily sales report on popular items (what was sold the most) Downloadable in CSV format
- 4.3 F11 Produce a weekly sales report on popular items (what was sold the most) Downloadable in CSV format
- 4.4 F12 Produce a monthly sales report on popular items (what was sold the most) Downloadable in CSV format
- 2.2 F2 Deactivate member (remake in PHP)
- 2.3 F3 Search for member (remake in PHP)
- 2.4 F4 Edit existing member (remake in PHP)

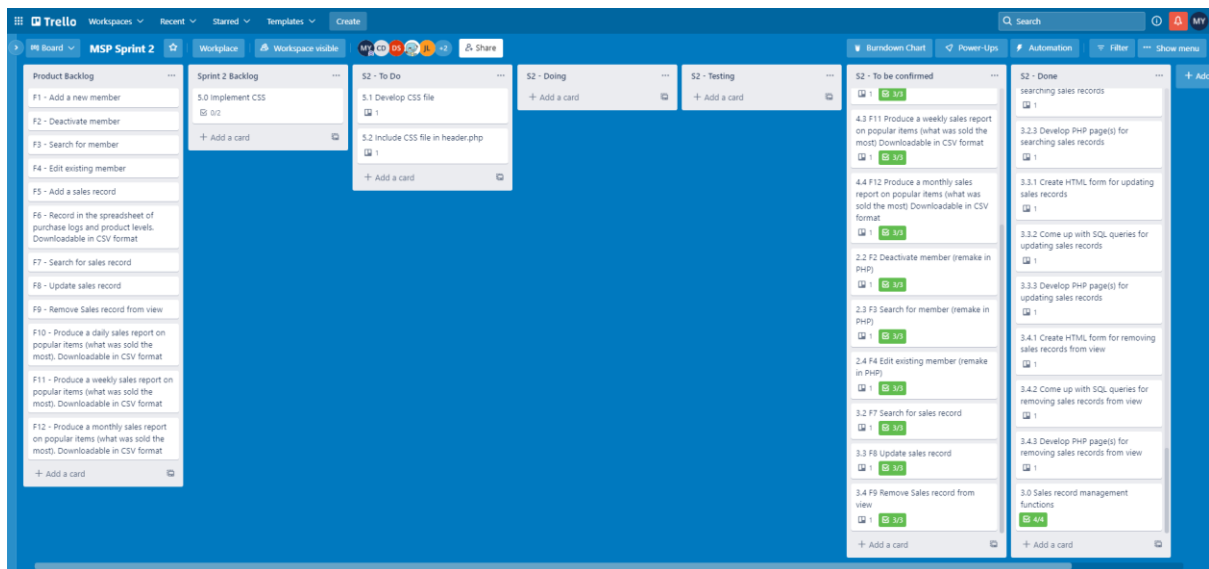

S2 - Done

- 2.2.2 Come up with SQL queries for deactivating members
- 2.2.3 Develop PHP page(s) for deactivating members
- 2.3.1 Create HTML form for searching members
- 2.3.2 Come up with SQL queries for searching members
- 2.3.3 Develop PHP page(s) for searching members
- 2.4.1 Create HTML form for editing members
- 2.4.2 Come up with SQL queries for editing members
- 2.4.3 Develop PHP page(s) for editing members
- 2.0 Member management functions

Day 8 (11/5/22)

Day 9 (12/5/22)

Day 10 (13/5/22)

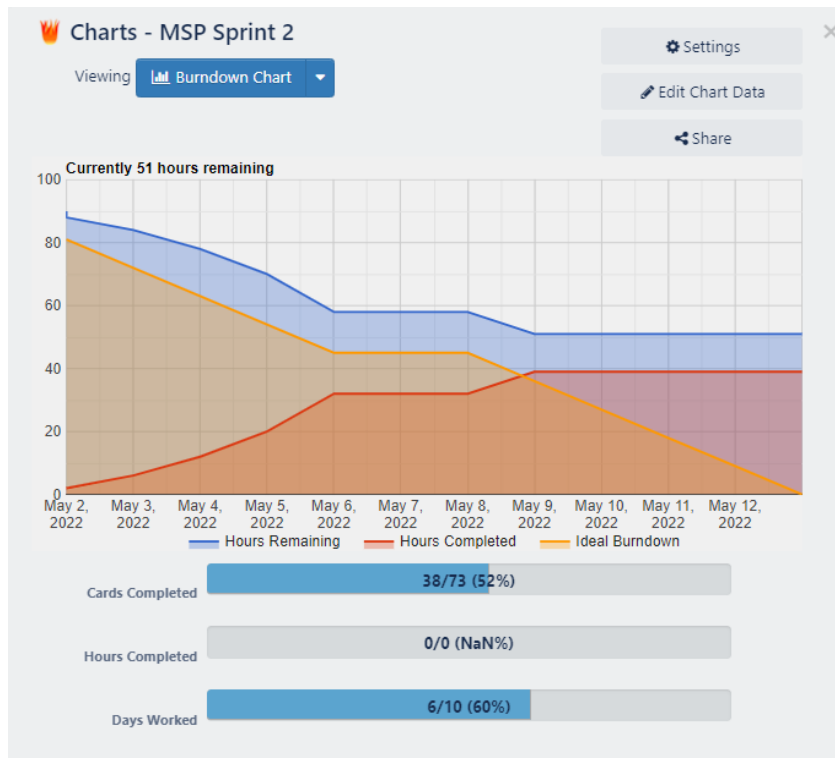

The screenshot displays a Trello workspace titled "MSP Sprint 2". The interface includes a top navigation bar with options like "Workspaces", "Recent", "Starred", "Templates", and "Create". Below this, a "Board" tab is active, showing a Kanban board layout. The board is organized into several columns:

- Product Backlog**: A list of tasks including "F1 - Add a new member", "F2 - Deactivate member", "F3 - Search for member", "F4 - Edit existing member", "F5 - Add a sales record", "F6 - Record in the spreadsheet of purchase logs and product levels. Downloadable in CSV format", "F7 - Search for sales record", "F8 - Update sales record", "F9 - Remove Sales record from view", "F10 - Produce a daily sales report on popular items (what was sold the most). Downloadable in CSV format", "F11 - Produce a weekly sales report on popular items (what was sold the most). Downloadable in CSV format", and "F12 - Produce a monthly sales report on popular items (what was sold the most). Downloadable in CSV format".
- Sprint 2 Backlog**: A column for tasks to be worked on in the current sprint.
- S2 - To Do**, **S2 - Doing**, **S2 - Testing**: Columns for tasks in different stages of the sprint.
- S2 - To be confirmed**: A column for tasks that need confirmation.
- S2 - Done**: A column for completed tasks.

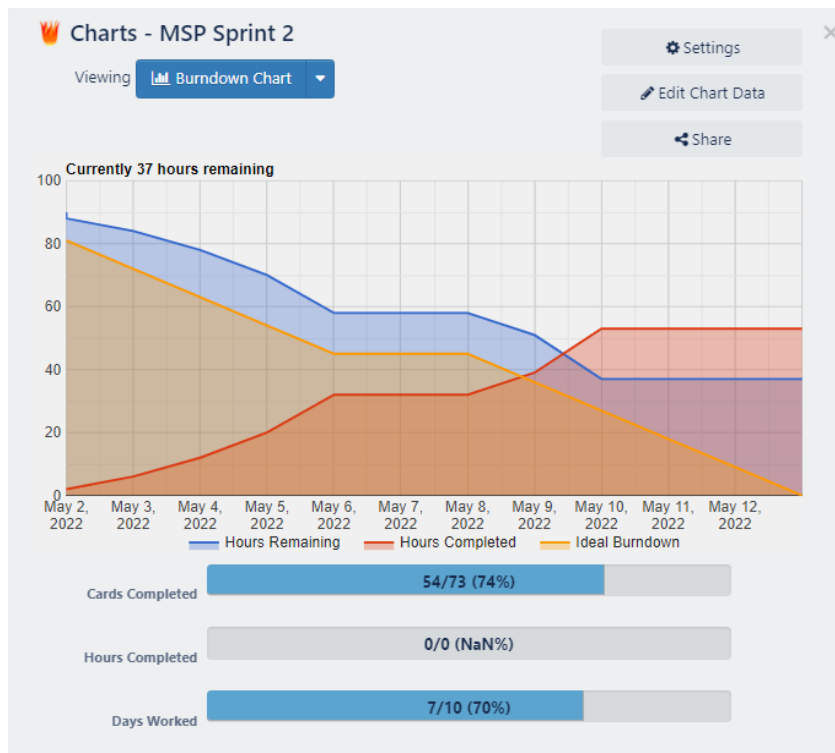

Each column contains task cards with titles, descriptions, and progress indicators (e.g., "3/5", "4/5", "5/5"). The "S2 - To be confirmed" column has cards for tasks like "4.3 F11 Produce a weekly sales report on popular items (what was sold the most). Downloadable in CSV format", "4.4 F12 Produce a monthly sales report on popular items (what was sold the most). Downloadable in CSV format", "2.2 F2 Deactivate member (remake in PHP)", "2.3 F3 Search for member (remake in PHP)", "2.4 F4 Edit existing member (remake in PHP)", "3.2 F7 Search for sales record", "3.3 F8 Update sales record", and "3.4 F9 Remove Sales record from view". The "S2 - Done" column has cards for tasks like "3.2.2 Come up with SQL queries for updating sales records", "3.3.3 Develop PHP page(s) for updating sales records", "3.4.1 Create HTML form for removing sales records from view", "3.4.2 Come up with SQL queries for removing sales records from view", "3.4.3 Develop PHP page(s) for removing sales records from view", "3.0 Sales record management functions", "5.1 Develop CSS file", "5.2 Include CSS file in header.php", and "5.0 Implement CSS".

Burndown chart

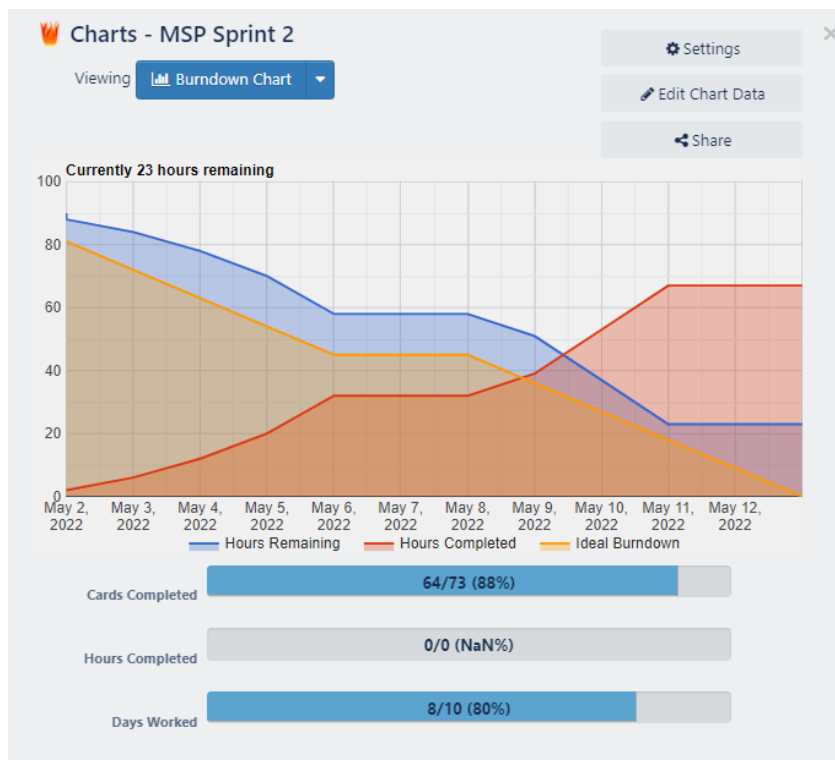

Day 6 (9/5/22)

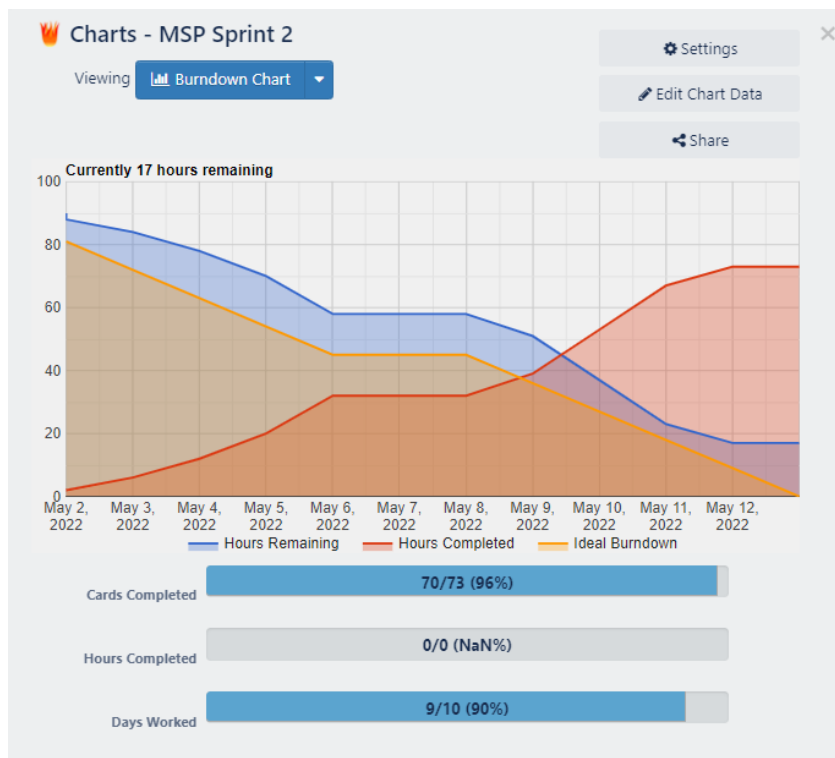

Day 7 (10/5/22)

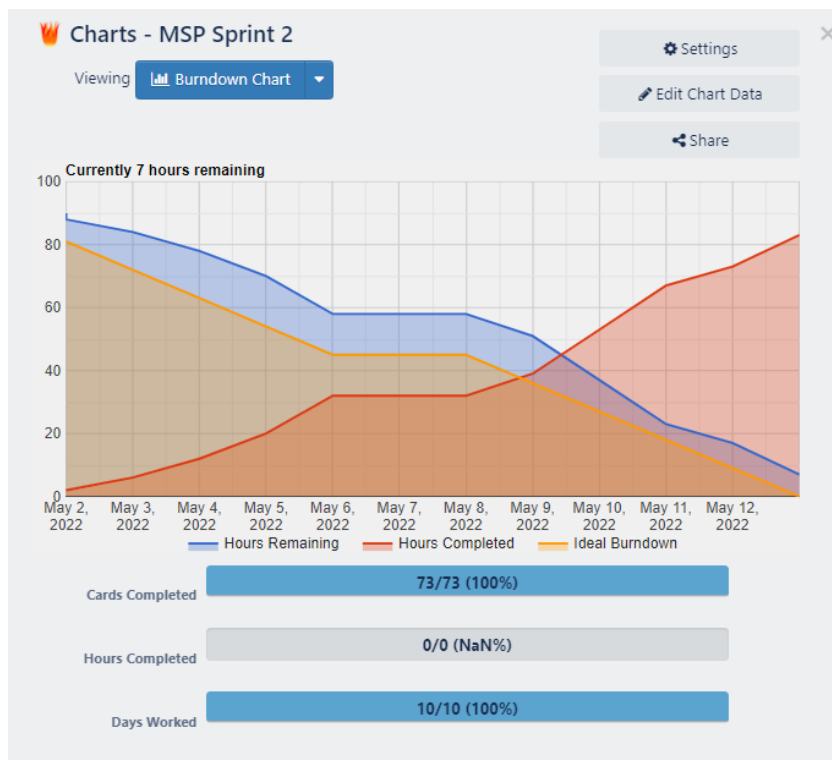

Day 8 (11/5/22)

Day 9 (12/5/22)

Day 10 (13/5/22)

The estimated time for the completion of Sprint 2 is 90 hours. We managed to complete all tasks for Sprint 2 in 83 hours. The 7 hours remaining at the end of sprint 2 indicates that we completed all our tasks earlier than expected. This means that there was a slight overestimation of the time needed to complete Sprint 2. This is an improvement compared to Sprint 1, as the estimated time for the completion of Sprint 1 is 112 hours, but there were 12 hours remaining at the end of that sprint and not all tasks were completed.

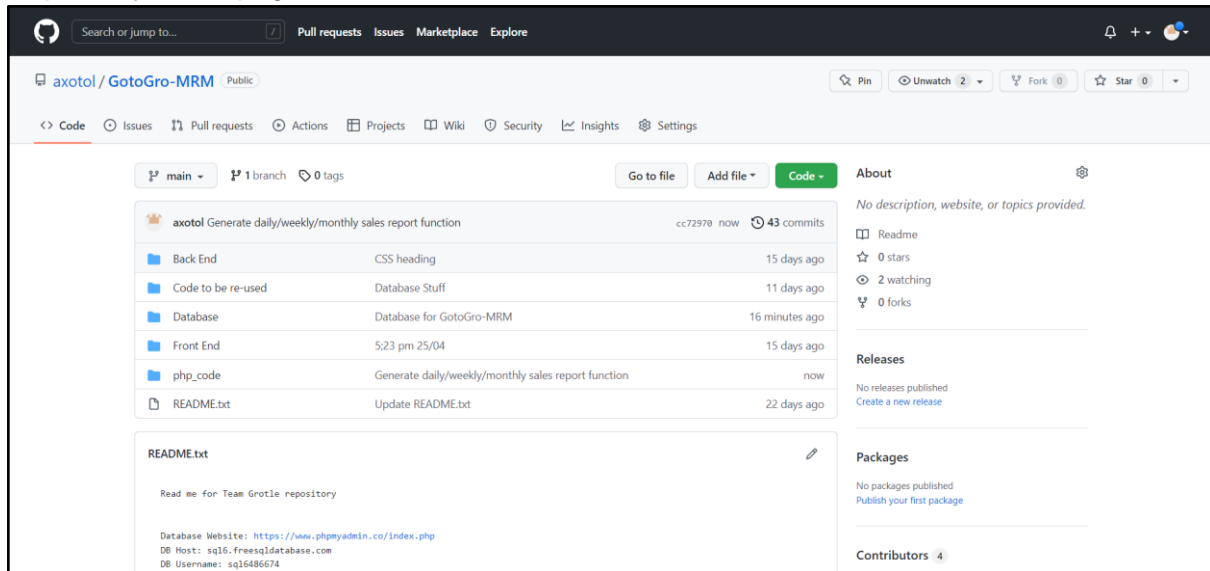

This improvement and the success of Sprint 2 was due to the fact that the development team was able to improve on the development process by learning from the mistakes made in Sprint 1.

Repository

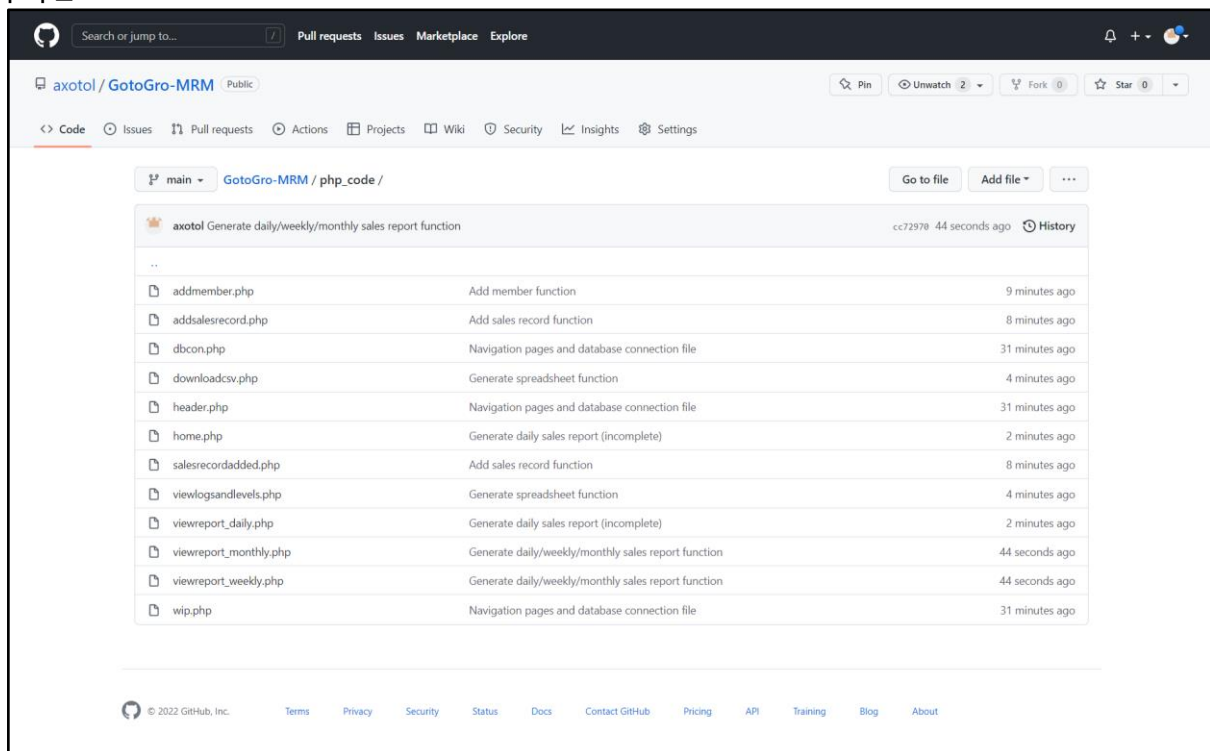

Day 6 (9/5/22)

The code uploaded in these screenshots was completed on Day 6 of Sprint 2 (9/5/22). However, they were only uploaded to our repository on Day 7 (10/5/22) since our team was waiting for Task 17p to be approved.

Repository home page:

php_code folder:

Day 7 (10/5/22)

Repository home page:

The screenshot shows the GitHub repository home page for `axotol/GotoGro-MRM`. The repository is public and has 44 commits. The main branch is selected. The repository contains several files and folders, including `Back End`, `Code to be re-used`, `Database`, `Front End`, `php_code`, and `README.txt`. The `README.txt` file is expanded, showing the repository's purpose and database connection details.
