Task Board

Note:

- In Sprint 2 Backlog, the first item (1.0 Set Up) does not relate to any one Product Backlog item. It is for establishing the foundation of the website (setting up the database and navigation pages).
- The fifth item (5.0 Implement CSS) also does not relate to any one Product Backlog item. It is to make the entire website look more appealing in response to the stakeholder's feedback received in Sprint 1's product review.
